International Intensive Course/Workshop on Hydrological Drought
An international intensive course and workshop on Hydrological Drought will be held at the Université Mohammed V, Agdal-Rabat (Morocco), 29 October – 3 November 2006. Objectives are:
1) dissemination of knowledge and skills on drought by a team of international lecturers (e.g. Canada, Czech Republic, the Netherlands and Norway) using the Elsevier book on Hydrological Drought (Tallaksen & van Lanen, 2004);
2) exchange of knowledge on (semi-)arid hydrology and associated drought aspects.
The intensive course will contribute to the development of the MSc Ressources en eau et technologie de l’information (MAWARID)(Université Mohammed V Agdal, UM5A). The programme contains: lectures, worked examples (PC), self-guided tours (PC) and two parallel workshops where participants work on case studies using drought assessment tools (PC). In addition there is a workshop in which participants can provide own experiences on drought and (semi-) hydrology.
The course will be financed by the EC TEMPUS MEDA project SWARP-ITC JEP30117. Course coordinators are: dr.ir. Henny A.J. van Lanen (Wageningen University), dr. Lena M. Tallaksen (University of Oslo), dr. Abdelkader Larabi (Université Mohammed V) and ir. Ewa Wietsma (Wageningen University).
